Your Touchstone Energy® Partner

Are you planning on “Building the Home of Your Dreams”?

We can help! Clay Electric Cooperative and the Association of Illinois Electric Cooperatives have revised the energy construction tips booklet titled “Illinois Touchstone Energy Home - Building the Home of Your Dreams”.

The booklet is now available free of charge, to members thinking of building a new home. You can access it on www.ceci.coop or we have a few copies at the Cooperative headquarters.

The booklet shows recommended construction standards, air sealing and insulating standards for basements, crawlspace areas, walls, floors, and attics. It also covers windows and doors, HVAC systems, water heating and lighting.

Clay Electric Member Services Director Doug Hockman says “ I built a new home 10 years ago and I won’t say I followed all of the recommendations given to me at that time, but most of them, and we had a very comfortable energy efficient home.

Making the decisions now to build the home to these standards, will save you money for several years to come.
