

Home Rebates

Who?

Members of Menard Electric Cooperative who live in the home as their primary residence and don't qualify for the Low Income Community Weatherization Program could be eligible for a \$1,500 Home Rebate. See www.capcil.org for information on the weatherization program.

What?

Home is our energy efficiency program promoting the installation of insulation and energy efficient heating and cooling systems through financial rebates of up to \$1,500.

Rebates will be given as follows:

- \$1,500 for a geothermal heat pump. Closed loop 14.1 EER or 3.3 COP; Open loop 16.2EER or 3.6 COP. This also qualifies for Menard Electric's \$600 rebate.
- \$1,000 for a 16 SEER air source heat pump. This also qualifies for Menard Electric's \$200 rebate.
- \$350 for a 95% efficient natural gas or LP furnace.
- \$350 for a 16 SEER central air conditioner.
- \$250 for a 2.0 heat pump water heater. This also qualifies for a \$75-\$100 Menard Electric rebate.
- \$500 maximum, 30% of costs of insulation and weatherization.

\$1,500 max rebate per household. Some restrictions apply to Home and Menard Electric rebates. See www.menard.com.

When?

The program began in May and will continue until all funds are exhausted. The program is run on a first-come first-served basis. Call today if you're interested!

Why?

The grant funds come from \$1.5 million in federal American Recovery and Reinvestment Act funds through the Illinois State Energy plan.

How?

Call our office today at 217-632-7746 to set up a personal energy assessment of your home. We'll conduct these Mon-Fri 8 a.m. – 3 p.m. as scheduling allows, for a \$25 fee.

After the assessment you'll submit a proposal of the improvements you wish to make and we'll set aside the rebate funds for you for 60 days.

Once your project is complete you'll send us a form and receipt and we'll send you a check! It's that easy.

Don't Forget

You could be eligible for an additional tax credit for 30% of your project, up to \$1,500. Credits include geothermal, air source heat pumps, central air conditioners, insulation and more. Ask your tax preparer for more details.
