

WE CAN'T CONTROL MOTHER NATURE

BUT WE CAN HELP YOU PREPARE

Monroe County Electric is now offering the Briggs & Stratton Home Generator System line of standby and emergency generators. Briggs & Stratton is one of the leading and most well know names in small engines.

Residential generators are available from 7 kW to 20 kW and can be operated on natural gas or propane. Smaller and larger units can be shipped within a week of order.

These units are available with transfer switches that automatically start the unit and transfer to standby power in the event of a power outage. When utility service is restored, the transfer switch changes back to utility power and shuts down the generator.

The Briggs & Stratton product line was chosen for its long history in the small engine business and its commitment to a quality line of products at reasonable prices. By choosing Briggs & Stratton, we have a product that has proven reliability and a manufacturer that will be around for a long time to come.

If you are looking for a quality generator from a quality manufacturer, contact us for a price quote. Call us at 939-7171 or 800-757-7433, extension 115.
