

# Save Energy and Feed the Hungry

Bring us a commercially canned or packaged non-perishable food item and we'll give you a compact florescent light bulb in exchange. We'll then donate the food to a local food pantry to be given to those in need.

The bulb is a 32 watt CFL which is comparable to a 120 watt incandescent bulb. This offer is for members of Monroe County Electric Co-Operative only and is limited to four bulbs per member, while supplies last.

Saving energy while feeding the hungry. Your electric cooperative improving the quality of life for all.
