

Changing habits saving money

Saving money on electricity may seem hard but it really isn't. It's about changing habits... like turning off lights when you leave the room, remembering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances when they're not in use and lowering blinds bering to unplug appliances applied to unplug appliances applied to the summer heat out. Your Touchstone Energy® co-op wants to help you save on your electric bill. Visit www.togetherwesave.com and see how the little changes add up.
