

◆———— Convenient payment options ————◆

Save money on stamps, and avoid late payments!

Rural Electric Convenience Cooperative offers several automatic payment options to save you time, money and worries every month! You can make your auto payments with a checking or savings account, MasterCard, VISA or debit card, and never miss another Due Date. You'll still get a billing statement that shows your energy consumption and the amount due for the month. The payment is applied just before the Due Date.

You can download an authorization form for automatic bank transfers or credit card payment at our Website at www.recc.coop. Or, call our office to request a form!

Online Statements

You can continue to receive your electric bill in the mail, or you can save paper and money by signing up for online bill viewing and payment from our Website home page. You'll receive an e-mail notification as soon as the monthly statements are completed. You can view your statement, with an option to print it out.

Any member can sign up for online bill viewing and payment. This secure site shows your billing and payment records for an extended number of months, along with graphs of your monthly and average usage for the past year. You can even reprint past billing statements for any month needed.

Budget Billing

The Budget Billing option lets you make a steady payment for 11 months, with a catch-up made in the 12th month. Starting with a 12-month history, we'll calculate a budget amount for your account that can be adjusted if you make significant changes in your usage habits. A new Budget Billing amount begins every year in November.

Ask us about these billing and payment options, to make your monthly bill-paying chores a little easier!
