

**MAKE YOUR
VOICE
HEARD!**

**Can you afford to
pay more
for your electricity bill?
THE EPA THINKS YOU CAN.**

The EPA's proposed reductions in carbon dioxide emissions would lead to more coal-fired power plants being shut down, or adding carbon capture systems that could increase the cost of electricity production by up to 75 percent! Please register your comments at www.action.coop to support an "All-Of-The Above" energy strategy that includes our nation's economical, plentiful coal supply.

**Go to the Action.coop website
or clip and send the form below to support affordable electricity!**
