Rescue Your Dying Septic System NOW!

Just Pour Safe, Easy To Use Powder Into Your Commode and Finally...

END SEPTIC TANK BACKUP CLOGGING and SMELL

**RESULTS VISIBLE
OVERNIGHT!**

WHY SEPTIC TANKS BACK UP Septic tanks Clog, Backup and Smell because of household cleaners, which are great for dishes, laundry and floors, but kill good bacteria in your tank and cesspool that normally digest solid wastes, fats, greases and starches. Without this bacterial action solid waste builds up in your system. They overflow into and clog your drainfields, lines and back up into your tank, causing overflows and smells. Even pumping your tank will not clean out the pipes or drainfields, but SEPTIPRO® will!

HOW SEPTIPRO® WORKS TO SAVE YOUR DYING SYSTEM! It goes to work immediately with 3 Safe Potent Enzymes and Bacteria supplement that works with your good bacteria to break down and digest fats, greases, starches, and all organic waste materials including paper and cotton fibers. It converts and liquifies all organic solid wastes. Cleans tank, pipes, and drainfields. Drainfields become porous allowing earth to absorb. The entire system opens and works from beginning to end.

SEPTIPRO® SAVES YOU MONEY! No more costly mechanical cleaning, digging or pumping.

SAFE AND EASY TO USE! Just pour SEPTIPRO® into your commode, let it work! Results usually visible overnight! Non-toxic, Poisonous or Corrosive. Harmless to Humans, Animals or Plumbing. Will make your system odor-free. SEPTIPRO® IS GUARANTEED TO KEEP YOUR SEPTIC SYSTEM TROUBLE FREE OR WE WILL REFUND EVERY PENNY YOU PAID FOR YOUR SEPTIPRO®. 1 lb. for initial treatment of 1000 gal. tank or 4 routine monthly 4 oz. treatments.

I understand that SEPTIPRO® is fully guaranteed and if it does not do as claimed, I can return the unused portion within 30 days and get all of my money back.

**YOU DON'T RISK A PENNY!
Order Now! Money Back Guarantee!**

SEPTIPRO® • P.O. Box 9099 • Rochester, MN 55903

Bush on the record

How will President Bush treat the rural electric program? How high is rural development on his agenda?

Undoubtedly, there will be answers to these questions in the days and months ahead as the new Administration sets up shop—including choosing a new administrator for the Rural Electrification Administration (REA), the government agency that lends money to rural electric and telephone cooperatives.

But for now, the only thing people in the rural electric program have to go on is what the Vice President said during the election campaign. Precious little was said on these subjects along the campaign trail, but on three occasions Bush put his views in writing.

The first time was in response to a questionnaire sent to all of the primary candidates in January by the political action committee for the nation's 1,000 consumer-owned rural electric cooperatives. On a question about REA, Bush said, "I consider it to be one of the key ingredients to a strong rural economy. A goal of the Bush Administration will be to look at the REA's role as part of the total rural economy that needs our support in bringing about a full recovery to rural America."

On the future of federal power marketing agencies, Bush stated, "Privatization of some government functions deserves our careful consideration ... I support reducing federal spending where possible, and I will consider all proposals that suggest federal savings, while protecting the level of services."

The privatization issue cropped up again in August in the platform the Republican Party adopted at its convention in New Orleans. The statement read, "We resolve to defederalize, denationalize and decentralize government monopolies that poorly serve the public

and waste the taxpayers' dollars."

The platform included this encouraging statement about REA: "We continue to support a strong rural electrification and telephone program. We believe the network of local rural electric and telephone cooperatives that provide these services represents a vital public/private partnership necessary to assure growth and development of the rural economy."

This fall, President-elect Bush had another chance to put his thoughts on rural America into writing when he and Michael Dukakis were asked to send a message to regional meetings of rural electric leaders:

"I believe that the more than 60 million Americans who live in rural America should enjoy opportunities equal to those enjoyed by urban citizens—the same job opportunities, access to services and quality of life," Bush wrote. "To ensure a prosperous future, we must develop all aspects of the rural economy. Strong support for rural cooperatives is a basic commitment I have made to the future of rural America..."

"Our rural electric and telephone cooperatives have an outstanding record of bringing essential services to the countryside. You have had and you will have a vital role in building a bright future for our Main Street businesses, farmers and ranchers.

"The key to rural development is effective local leadership working in partnership with private business, cooperatives and federal, state and local governments. In my Administration, we will make more effective use of federal resources to encourage such partnerships. An important part of this program will be to expand our efforts to make rural communities more attractive to industry," Bush said.

Country Christmas

Tim and Mary Lou Flach, along with granddaughter Amanda, set the Christmas table with their special china.

It's hard to imagine a better combination for Christmas decoration than a log cabin in the woods, a 15-foot ceiling and a tall, thin Christmas tree, especially when the living room the tree's in also boasts a massive stone fireplace. That's exactly the setting in the Tim and Mary Lou Flach home near Montrose (Effingham County).

But the combination presents a "problem" that many of us would love to have. "It's hard to find a tree that's tall enough," Mary Lou says, "because when they grow upward, they usually grow outward, too. We have to search like crazy to find a tall, skinny tree!"

When they find just the right tree, they *do* make it worth the effort. They decorate it with all kinds of paper chains, lights, globes, tinsel, candy canes and so on. But they don't stop there. Every wall in the house has its wreath, either from vines or pine greenery or holly, and about every level surface has a decoration of some kind sitting on it.

Their son Tony and his wife, Karen, who live nearby, join in too, decorating their similar home equally lavishly.

Tim and Mary Lou, whose home is served by Norris Electric Cooperative, also break out a special Christmas china set for the occasion, and they set a festive table for the 15 or so who turn out.

We're fortunate," Mary Lou says, "in that all our sons and their families live within a few miles of us, so they can spend the holidays here. One son, Gary, still lives at home and goes to Lakeland Community College in Mattoon."

Besides Gary and Tony and Daren, Chris and Lori are usually there, and so are Kevin and Lylah and Dan and Christy. Chris and Lori, incidentally, have also built a log home, which is sort of an underground house, too.

The Flachs, who operate Custom Crop Service, about a mile south of Montrose, showed a hint of their creativity when they converted an old barn into a headquarters building and entertainment center for their operation and turned its silo into a nice part of that center by putting a cupola at the top for viewing the surrounding countryside.

They also operate Newton Terminal, Inc., which consists partly of a small office building and a couple of million-

gallon storage tanks for liquid nitrogen fertilizer.

A nearby log cabin is a lot like their houses, which sit about 50 yards apart in a wooded area, and is the home of Tony's log house dealership.

Tony was the first to build a log home, and dad Tim had been interested in them for years. The logs, 6x10 inches in size, are of pine. Tony chinked his with cement, even though there is a spline down each log that helps seal out wind and moisture. "Chinking," incidentally, is the practice of putting some kind of filler between the logs. Tim, who built later, used a new material called Perma-Chink, a product that will not pull away from the logs when they begin to shrink, as they usually do.

A well-decorated home, whether of log or of more conventional construction, is part of the way cordial people have of saying, "Merry Christmas," the Flachs believe, and they do practice that custom!

The Flach family found a new use for an old mine bucket: It's now a Christmas decoration outside their log home.

BRIEFLY

News items of interest to members of Illinois electric cooperatives

REA updates capsule review of RE program in Illinois

The Rural Electrification Administration has recently released its annual update of statistics for the rural electrification program in Illinois, as of January 1, 1988. You may find this review interesting: "Over the history of the rural electrification program, REA has approved \$442,878,447 in loan funds to 31 REA borrowers in the state, including 30 cooperatives and one electric company. Loan guarantee commitments approved total \$1,003,787,000. These funds have helped finance distribution and power supply facilities to serve an estimated 233,055 rural consumers over 54,014 miles of line. The first REA loan in Illinois was approved in September 1935, with the first REA-financed line energized May 6, 1936, by the Suburban Electric Corporation, Dunlap. As of January 1, 1988, REA had advanced \$421,503,947 to borrowers in Illinois. The funds have been invested by the borrowers in local electric facilities. Of the 90,000 farms in the state, nearly all are receiving electric service. Only 12.3 percent of Illinois farms had central station service when REA was created in 1935. By January 1, 1988, REA borrowers in Illinois had made a total of \$308,195,275 in payments on their government loans. The payments included \$169,764,344 repair on principal as due, \$626,754 of principal paid ahead of schedule and interest payments of \$137,804,177. Rural electric systems provide effective leadership in rural development and are committed to serve all persons in their areas without regard to race, color, national origin, handicap or age."

Satellite TV bill clears Congress

Congress finally cleared legislation to free distributors of satellite television shows from legal uncertainties surrounding program copyrights. The Satellite Home View Copyright Act, sponsored by Reps. Robert Kastenmeier (D-Wis.) and Mike Synar (D-Okla.), establishes a payment schedule for holders of program copyrights, thus clarifying the vexing question of who pays how much for satellite transmission of reruns of popular television shows. Enactment of the measure is a boon to Rural TV, the satellite programming service established by the National Rural Telecommunications Cooperative to bring a wide range of television programs into the homes of rural electric and telephone cooperative consumers.

Small town officials decry lack of funds

Lack of money is the "biggest headache" local government officials face, according to a survey conducted by the National Association of Towns and Townships. "There isn't enough money to do all we have to do today," one local official complained. The officials cited erosion of local tax bases, combined with reductions in state and federal financial help—especially the complete loss of federal revenue sharing payments—as the cause of their money troubles. Their second biggest headache, complying with federal and state requirements, also reflects the dearth of dollars, the association's executive director said. "Local governments are being asked to do more and more with less and less outside financial help." Third on the officials' list of major headaches was the sad condition of local roads and bridges. Working with and serving people topped with survey's list of greatest pleasures—although one local official listed "people" as both his greatest pleasure and his biggest headache.

Foreign countries have easy time with debt prepayment

Two foreign countries repaid U.S. government loans in a cakewalk compared to the trouble electric power supply co-ops have faced in recent years. Tunisia and Israel had staunch support from the Reagan Administration in their bids to refinance almost \$3 billion in weapons-purchase debts to the Federal Financing Bank (FFB). The FFB also lends money to generation and transmission co-ops that supply power to many of the nation's 1,000 consumer-owned rural electric systems, but those co-ops faced stiff opposition from the Administration in their efforts to prepay their loans and save rural power consumers millions of dollars.

After eight years of fighting with President Reagan over the life of the Rural Electrification Administration (REA), rural electric leaders predict they will have a smoother relationship with president-elect George Bush.

"We have an opportunity to sit down with the new Administration and find some common ground on issues like

RE leaders optimistic about Bush presidency

rural electric financing and at least talk," says Jim Hubbard, executive vice president of the North Carolina Association of Electric Cooperatives. "That's an opportunity we didn't have with Reagan."

Like many rural electric leaders, Hubbard believes that President-elect George Bush will be more sympathetic to the financial needs of the nation's 1,000 consumer-owned rural electric cooperatives that his predecessor was. The Reagan Administration tried repeatedly to deny federal financing to nonprofit utilities and even proposed closing REA down, saying that the co-ops should get loans from private lenders.

REA lends money to the co-ops, which provide electricity to consumers in many sparsely populated areas of the country. Because of low populations in those areas, consumers pay up to 40 percent more for their electricity than city dwellers. Because private financing is more expensive than an REA loan, the co-ops would have to raise rates even further without the REA.

"Bush is probably more sympathetic to the rural electric program than is Reagan," says Craig Thomas, general manager of the Wyoming Rural Electric Association. "He sees the rural electric program as one of the means, perhaps, of strengthening the economies of the rural areas."

In fact, in a pre-election statement, Bush called the REA "a key ingredient to a strong rural economy."

"We've always had a tough battle in maintaining the strength of our lending program," says Frank Stork, general manager of the Association of Missouri Electric Cooperatives. But he says Bush will be "fair" with the co-ops. "It's not going to be as tough a split between the White House and Congress."

Traditionally, congressional supporters of the rural electric program have been able to quell Reagan's attempts to weaken it.

The head of REA is a Presidential appointee, and Bush likely will make that appointment after he takes office in January. Reagan's choice for the job, Oklahoma rancher and politician Harold Hunter, unsuccessfully attempted to carry out a mandate from the White House to put his agency out of business during his eight years at the helm.

Bob Bergland, executive vice president of the National Rural Electric Cooperative Association (NRECA), says he hopes the new REA administrator will work to strengthen the agency. "We're watching the REA administrator matter very carefully," says Bergland, a former Agriculture Secretary under President Carter. "In '81, Ronald Reagan told the people he would dismantle the agency and wouldn't appoint anyone who wouldn't cooperate. Whether Bush will keep the REA or not will determine who the REA administrator will be.

"If he's going to try to make it work, there are a number of highly qualified Republicans" who might take the job, Bergland says.

—Rural Electric News Service

Retired Wayne-White Electric manager Bill Endicott is the recipient of the 1988 Cooperative Manager Award presented by the Illinois Cooperative Coordinating Committee, which represents major agricultural marketing, service and supply cooperatives.

Keys to success: other people and cooperative way

Like many successful managers, Bill Endicott attributes much of his success to other people and to the cooperative way of doing things.

Endicott, recently retired manager of Wayne-White Counties Electric Cooperative, Fairfield, was honored in October by the Illinois Cooperative Coordinating Committee (ICCC) as recipient of the ICCC Cooperative Manager Award for 1988. Managers of all types of cooperatives across Illinois are eligible for the award, presented during Cooperative Month observances each year.

"I've been fortunate to have a good board of directors," he says. "The board members are successful businessmen and farmers and have a good working

relationship with their fellow member-owners of the co-op.

"The board's job is to keep informed and to set policy," he continues, "and our board is good at that. They were astute enough to set policy and make me responsible for the day-to-day business decisions."

Endicott's selection for the honor culminated 39 years of service to cooperatives. In 1949, Endicott hired on as an accountant and later became office manager. He was selected as manager in 1977 and retired in October after more than 11 years as manager.

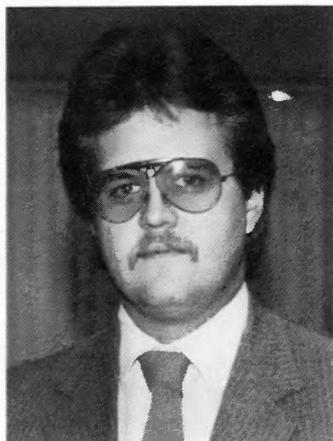

While a co-op is different from many businesses in that it is not intended to make a profit, it must still operate in a sound, businesslike manner, and Endicott kept Wayne-White on an even keel by following a simple guideline: "I tried to make business decisions for the co-op just like I'd have made them if it were my own business," he says, "and just as if I were spending my own money."

"Members are an important part of any cooperative," he emphasizes, "and I believe ours are some of the very best. We've worked hard to keep them informed and involved in the co-op, and we have a good working relationship with them. That helps a lot."

Endicott was a director of Soyland Power Cooperative from 1977 until his retirement and served as chairman of its finance committee. He was vice president of the Association of Illinois Electric Cooperatives Managers' Association from 1983-84, and he served as its president the following year. He has served as chairman of a number of the group's committees and headed the continuing education committee until his retirement.

Endicott, a McLeansboro native, is a veteran of World War II and is active in church and community affairs. He is married to the former Wilma Duke of Cisne.

Coleman succeeds LeCrone at Shelby

Coleman

A ten-year veteran of the rural electrification program will succeed retiring manager William E. LeCrone at Shelby Electric Cooperative. James E. Coleman, operations superintendent of Clay Electric Cooperative at Flora, will assume his new duties in Shelbyville January 9.

The announcement was made November 8 by Neil E. Pistorius, president of the Shelby Electric Cooperative board of directors.

Coleman began his work in rural electrification at Clay Electric Cooperative in 1978. After several promotions, he was named operations superintendent

in 1983. Coleman is a native of Paris (Edgar County). He was graduated from Eastern Illinois University in 1979 and completed the management certification program of the National Rural Electric Cooperative Association in 1987.

LeCrone announced his retirement last June at the 50th anniversary meeting of Shelby Electric Cooperative. He has been employed by the cooperative for more than 44 years, the last 15 as manager.

Shelby Electric is a not-for-profit, member-owned electric utility. It provides electric service to more than 8,440 meters over 2,056 miles of energized lines. Member-owners live throughout rural portions of Christian, Cumberland, Effingham, Fayette, Macon, Montgomery, Moultrie, Sangamon and Shelby counties.

Portable heaters and comfort center

Portable space heaters allow families to adopt the "comfort center" concept to keep costs down while keeping warm. This concept is based on the idea of isolating a small area of the home—where most of the family congregates—and warming it with a space heater, while letting the rest of the house remain fairly cool.

There are many types of portable space heaters on the market, and electric and kerosene units are by far the most common. There are several things you need to know before you pick out a space heater. While price is always a factor; it should not be the only reason you chose a unit. Reputable testing agencies have tested many of the models available, and you should look for their labels when shopping.

Most portable electric heaters are 110-120 volts and range in capacity from about 500 to 1,500 watts, so you will need to be sure your house's wiring is adequate. If you are in doubt, you may prefer to buy two small heaters and connect them to different circuits. They generally cost from \$25 to \$50, depending on their features.

The most common electric heaters available today are fan-forced radiant heaters. You can buy them in several different sizes, capacities and shapes (low profile, upright, etc.) Generally, most electric heaters will have a circulating fan, an automatic thermostat with an "off" setting, and an automatic shutoff feature in case there is excessive heat buildup or if the unit tips over. A good heater should also have a high-temperature cord and plug and a carrying handle. The fan should be fairly quiet.

You will also want to check to see if the unit has the safer concealed heating elements, and make sure it has adequate air flow to distribute the heat it produces into the area you want warmed.

Kerosene heaters on the market now are an improvement over the ones made years ago, but they all require ventilation, which means opening a window or vent and wasting some of the heat they generate.

There are two kinds of kerosene heaters, radiant and convective. Kerosene heaters on the market today do not have thermostats to regulate their heat output. You have to turn the

heater on and off.

Newer units usually are built on a heavy base to reduce the tipping hazard, but look for one that shuts off automatically if it does tip over.

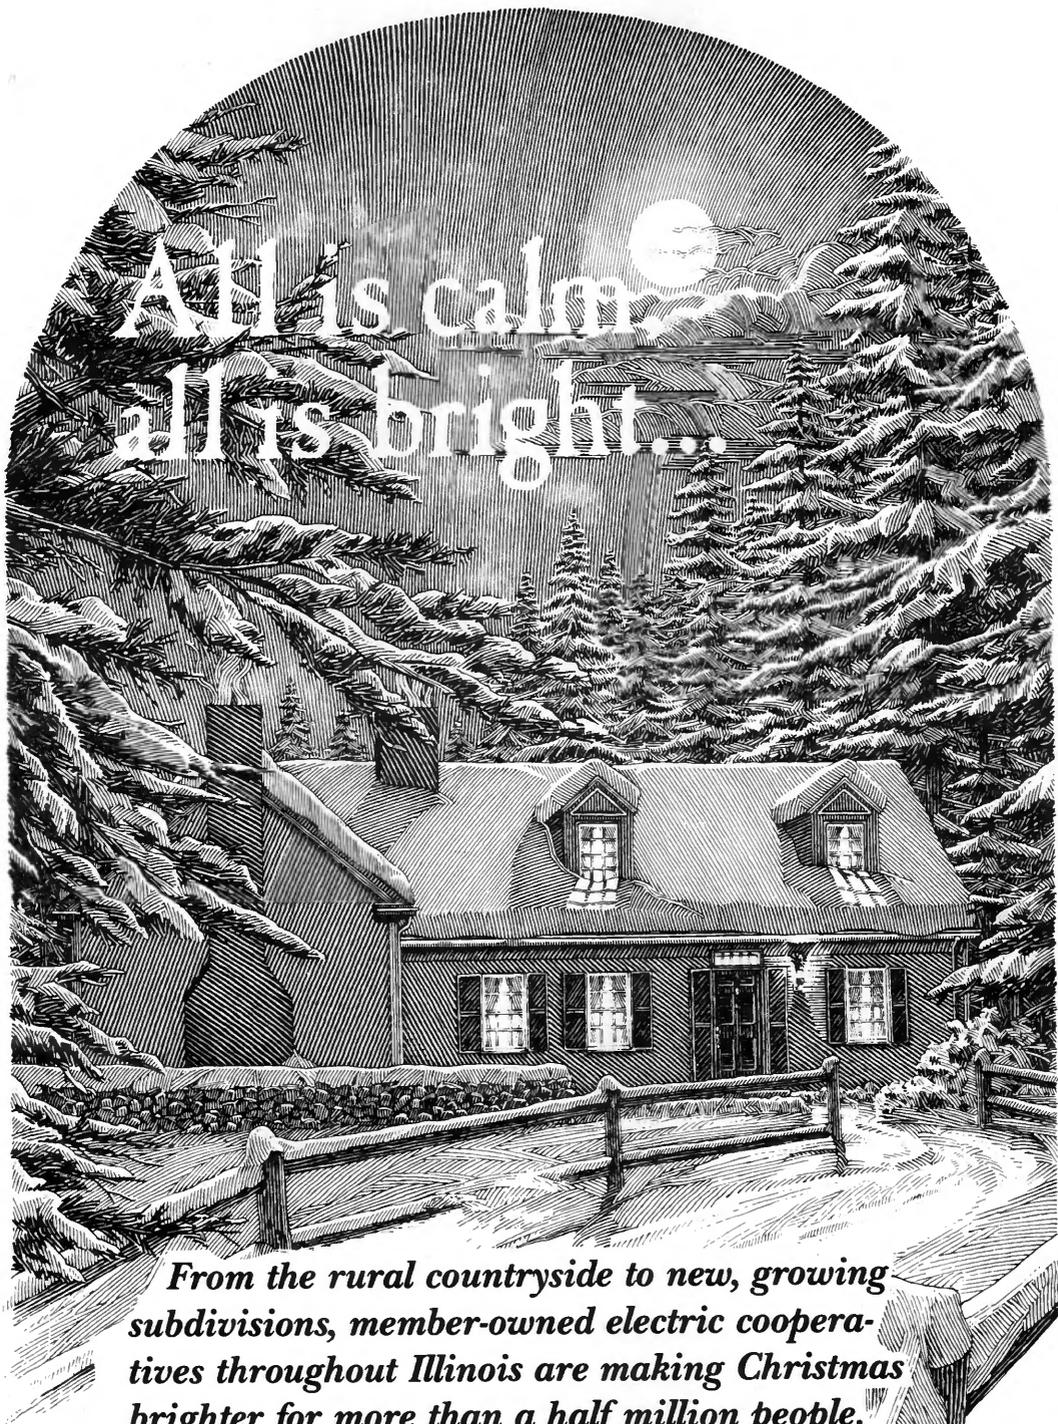

Never use any kind of gasoline in a heater designed to burn kerosene.

All portable space heaters present some danger. Since they give off heat, parts of them will be hot and will burn someone touching them. All may ignite nearby flammable materials. All require some special care when being used in the presence of children. Special care should be taken with electric heaters to keep them away from water, because water and electricity make a lethal combination.

Use caution

- DO choose a certified heater
- DO make sure it is properly connected
- DO read labels and follow all warnings and instructions
- DO keep clear space around the heater
- DO keep heater clean and in good repair
- DO keep a window or door partially open at all times when you use an unvented fossil fuel heater
- DO contact your electric cooperative if you need help determine the size of portable heater you will need
- DON'T use or store flammable liquids near any portable space heater
- DON'T put clothes on or over the heater to dry
- DON'T use a heater as a "foot warmer," as the surface may be hot enough to cause burns
- DON'T stand close to a heater while wearing long robes, nightgowns or other clothing that may catch fire
- DON'T let children play around the heater
- DON'T put the heater in locations where people can bump into them or trip
- DON'T let dirt build up inside heater
- DON'T use a portable electric heater in a bathroom
- DON'T forget regular inspections

All is calm,
all is bright...

From the rural countryside to new, growing subdivisions, member-owned electric cooperatives throughout Illinois are making Christmas brighter for more than a half million people. Your electric cooperative wishes you a peaceful and joyous holiday season.

Electric Cooperatives of Illinois

Good for ALL Illinois

An Affirmative Action Equal Opportunity Employer

Easy recipes make holiday entertaining a breeze

POPPY SEED BREAD

3 eggs
2 1/4 cups sugar
1 1/2 cups oil
3 cups flour
1 1/2 cups milk

1 1/2 tsp. baking powder
1 1/2 tsp. salt
1 1/2 tsp. almond flavoring
1 1/2 tsp. vanilla
1 1/2 tbs. poppy seeds

1/2 tsp. almond flavoring
1/2 tsp. butter flavoring

Beat eggs and sugar; add remaining ingredients (except poppy seeds) and beat 2 minutes. Blend in poppy seeds. Bake in 2 8-inch greased and floured loaf pans at 350 degrees for 1 hour. Leave bread in pans and while hot, poke holes in top and pour over glaze:

1/4 cup orange juice
1 cup powdered sugar
1/2 tsp. vanilla

QUICKIE FUDGE

1 box powdered sugar
1/4 cup milk
1/2 cup cocoa

1 stick butter
1 tsp. vanilla
Nuts

Blend sugar and cocoa with wire whisk to get lumps out. Add butter and milk. Microwave 2 minutes on high. Blend until smooth. Add vanilla and nuts. Pour into buttered dish and refrigerate 1 hour or put into freezer 30 minutes to set.

CANDIED-GRAPEFRUIT PEEL

2 large grapefruit, peeled
1/4 cup light corn syrup

2 cups sugar
1 cup hot water

To Remove peel: Use point of a sharp knife and cut through the peel but not into the fruit. Wash the grapefruit first of course. Start at the stem end and return to the starting point making a circular trip around a grapefruit or orange. Make a second circular cut around the fruit at cross angles to the first, thus dividing the peel into quarters. Slip the point of the knife under the end of one quarter section and slowly strip it off. Repeat until all sections are removed. Cut the peel into 1/4-inch strips or finer if you like.

To cook: Cover peel with cold water, bring to a boil and cook 20 minutes. Drain. Repeat the process and drain again. Combine syrup, sugar, and hot water. Cook over low heat, stirring until sugar is dissolved. Add grapefruit peel and cook to 230°F, or until a little of the syrup forms a soft ball after it is dropped from a spoon into cold water. Peel becomes transparent and most of the sugar is absorbed. Remove peel by heaping, slotted spoonfuls. Press each spoonful against the side of the pan to drain off most of the syrup and make the candied strips easier to separate. Use the spoon to sprinkle strips on foil or cookie sheets. When the peel has cooled and dried slightly, toss it in granulated sugar to coat.

Candied Orange Peel: Instead of grapefruit peel use peel of 4 large or 6 medium oranges; substitute 1 cup cooking water for the 1 cup of hot water and follow above recipe. Use the entire orange peel. Tangerine peel and lemon peel may also be candied.

EGGNOG CHIFFON PIE

COOKY CRUST:
1 1/2 cups crushed graham crackers with sugar and cinnamon topping OR chocolate cookie crumbs

1/4 cup (1/2 stick) butter, melted

FILLING:
3 tablespoons water
2 tablespoons rum
2 tablespoons brandy
1 1/2 envelopes unflavored gelatin

2 1/2 cups dairy eggnog
1/4 cup sugar
1/4 teaspoon salt
1 cup whipping cream

To prepare Crust: combine crumbs and butter. Press onto bottom and sides of 9-inch pie plate. Bake in preheated 350 degree oven, 5 minutes. Cool. To prepare Filling: in a small bowl, mix together water, rum and brandy. Sprinkle gelatin on mixture to soften. In a small saucepan stir together 1 1/4 cups eggnog, sugar and salt; heat just to the boiling point. Add softened gelatin; stir until gelatin is dissolved. Remove from heat. Add remaining 1 1/4 cups eggnog. Pour into a medium-size bowl; place plastic wrap on surface to prevent a skin from forming. Refrigerate until partially set, about 45 minutes. In a chilled bowl with chilled beaters whip cream until stiff. Fold into gelatin mixture. Turn into pie shell. Allow to set, then cover and chill 4 hours or overnight. Garnish with additional whipped cream, if desired.

VARIATIONS: COFFEE: Add 1 teaspoon instant coffee to eggnog mixture before heating. **PEPPERMINT:** Omit rum and brandy; use 1/2 cup water to soften gelatin. Stir 1/4 cup finely-crushed peppermint candy and 10 drops red food color into eggnog mixture before heating. Garnish with crushed peppermint candy, if desired.

BLACK BOTTOM EGGNOG CHIFFON PIE

1 baked pastry shell, 9-inch

FILLING:
3 tablespoons water
2 tablespoons rum
2 tablespoons brandy
1 1/2 envelopes unflavored gelatin
2 1/2 cups dairy eggnog

1/4 cup sugar
1/4 teaspoon salt
2 squares (2 oz.) semi-sweet chocolate
1 cup whipping cream

To prepare Filling: in a small bowl, mix together water, rum and brandy. Sprinkle gelatin on mixture to soften. In a small saucepan stir together 1 1/4 cups eggnog, sugar and salt; heat just to the boiling point. Add softened gelatin; stir until gelatin is dissolved. Remove from heat. Add remaining 1 1/4 cups eggnog. Pour 1 cup eggnog mixture into heavy saucepan. Pour remaining eggnog in a bowl; cover and refrigerate until partially set . . . about 50 minutes. Add chocolate to eggnog in pan; stir and heat until well blended. Pour into bowl and chill until partially set . . . about 40 minutes. When chocolate mixture is nearly set, beat until smooth. Spread in bottom of pie shell, refrigerate until set. In a chilled bowl with chilled beaters whip cream until stiff. Fold into plain eggnog mixture. Turn into pie shell on top of chocolate mixture. Allow to set, then cover and chill 4 hours or overnight.

HOLIDAY CROWN

2 pkgs. (3 oz. each) strawberry flavor gelatin
2 cups boiling water
1 1/2 cups cold water
2 pkgs. (3 oz. each) lime flavor gelatin

1/2 cup sugar
2 cups boiling water
1 cup cold water
1 envelope whipped topping mix

Dissolve red flavor gelatin in 2 cups boiling water. Add 1 1/2 cups cold water. Pour into an 8-cup mold. Chill until set, but not firm. Meanwhile, dissolve lime flavor gelatin and sugar in 2 cups boiling water. Add 1 cup cold water. Chill until slightly thickened. Prepare whipped topping mix as directed on package; blend into the lime gelatin. Spoon into mold. Chill until firm—at least 6 hours or overnight. Unmold. Garnish with fresh mint or holly leaves and whole cranberries around base, if desired. Makes about 8 cups

FRUIT JUBILEE

1 16 oz. can of peach slices
1 16 oz. can of pear slices
1 8 oz. can of pineapple chunks
1 16 oz. can of pitted black cherries
2 medium size bananas
1/2 cup slivered toasted almonds

Lemon juice
2 doz. medium size almond or coconut macaroon cookies
Brown sugar
1/2 cup margarine (1 stick)

Drain all canned fruit and set fruit juice aside. Place fruit in mixing bowl. Slice bananas, sprinkle with lemon juice and mix with fruit. In another bowl, crumble macaroons. Using a 2-qt. baking dish, layer half of the fruit mixture in bottom of baking dish. Cover with half of the crumbled macaroon cookies, dot with half stick of margarine, sprinkle with brown sugar and 1/2 cup of slivered almonds. Repeat layers. Pour 1/2 cup of drained fruit juice over layers. Bake at 325 degrees for 40 minutes. Makes 6 to 8 servings.

BROCCOLI SALAD

- 2 or 3 bunches fresh broccoli, cut into bite-size pieces
- 4 strips cooked bacon, crumbled
- 1/2 medium red onion, cut in rings
- 1/2 cup golden raisins

Dressing

- 1 cup mayonnaise
- 1/2 cup sugar
- 2 or 3 tbs. cider vinegar

In bowl assemble first 4 ingredients. Set aside. In small mixing bowl combine mayonnaise, sugar and vinegar; mix well. Add to broccoli mixture and toss. Serve immediately or refrigerate in an airtight, sealed container for later. Makes 6 to 8 servings.

BRUNCH STRATA

- 12 slices white bread
- 1 stick butter/margarine, softened
- 3 cups grated sharp cheddar cheese
- 1 1/2 cups ham or turkey
- 3/4 cup diced red bell pepper
- 2 scallions thinly sliced
- 3 cups milk
- 4 eggs, slightly beaten
- 1 tsp. dry mustard
- 1 tsp. salt
- Pinch cayenne
- Paprika garnish

Trim crusts from bread, spread with softened butter. Cut each slice into 4 strips. Butter a 13-inch x 9-inch baking dish and layer with half the bread strips, ham or turkey, cheese, red pepper and scallions. Repeat layers. Beat eggs, add seasonings and milk; pour over bread, cheese and meat layers. Refrigerate for 24 hours, covered. Allow Brunch Strata to come to room temperature before baking (about 1 hour out of refrigerator). Bake at 350 degrees for 45 minutes, or until puffed and slightly browned. Sprinkle with paprika and serve. Makes 6 to 8 servings.

HERB-ONION CRESCENTS

- 1 8 oz. can refrigerated crescent rolls
- 1/2 cup melted butter or margarine
- 1 tsp. crushed basil
- 1 tsp. crushed oregano
- 3/4 cup canned French fried onions, crushed

Separate dough into triangles. Cut each triangle in half lengthwise. Brush with melted butter, sprinkle with herbs and onions. Roll up from wide end to form crescent shape. Place on ungreased cookie sheet; brush tops of crescents with butter. Bake at 375 degrees for 10 to 12 minutes. Makes 16 rolls.

CHRISTMAS FUDGE

Candied Fruit makes this fudge attractive and good.

- 3 cups sugar
- 1 1/2 cups non-dairy liquid coffee cream
- 1 cup light corn syrup
- 1 tsp. salt
- 2 tsp. vanilla
- 2 cups candied pineapple and cherries
- 1 cup sliced almonds
- 1 1/2 cups broken pecan pieces

Combine sugar, cream, syrup and salt in a heavy saucepan. Stir to dissolve sugar; cook to 236 degrees without stirring. Remove from heat. Add vanilla and beat with electric mixer until mixture is creamy and begins to hold its shape. Stir in pineapple, cherries, almonds and pecans by hand. Press into two buttered 8-inch square pans and chill until firm enough to cut. Let stand in refrigerator 24 hours before serving. Makes about 80 pieces.

COOKIE ORNAMENTS

- 3/4 cup margarine
- 1 cup sugar
- 2 eggs
- 1/2 tsp. vanilla
- 3 cups flour
- 1 tsp. baking powder
- 1 tsp. salt
- Few drops food coloring

Quick Royal Frosting

- 2 1/4 cups powdered sugar
- 1 beaten egg white
- 1 1/2 tsp. lemon juice
- Food coloring

In mixing bowl, beat margarine and sugar until light and fluffy. Blend in eggs and vanilla. Add combined dry ingredients; mix well. Chill in sealed container for several hours or overnight. On pastry sheet, roll dough to 1/8-inch thickness; cut with cookie cutters. Place on ungreased cookie sheet. Bake at 400 degrees for 5 to 7 minutes or until edges are lightly browned. Cool slightly; remove from cookie sheet. Cool. Makes 4 dozen cookies. To make cookie ornaments, use a drinking straw to cut a small hole near edge of cookie. Bake as directed. When cooled, decorate with glaze or frosting and thread ribbon or yarn through hole and hang on Christmas tree. For snowflake pattern glazed cookies, combine corn syrup and food coloring. Paint cooled cookies using small brush. For frosted cookies, combine powdered sugar and beaten egg white in small mixing bowl. Beat for 1 minute with mixer. Add lemon juice while beating for 1 to 2 minutes longer until stiff. Add food coloring and decorate cooled cookies.

MOCHA DELUXE COFFEE

- 1 heaping tsp. instant coffee
- 2 heaping tsp. instant sweetened cocoa mix
- 1 heaping tsp. crushed butter mints
- 1 heaping tsp. non-dairy coffee creamer

In a 9 oz. mug, combine all ingredients. Add boiling water and stir. Garnish with whipped cream and chocolate shavings. Makes 1 serving. HINT: Substitute 1/8 teaspoon of cinnamon in place of butter mints, and garnish with a cinnamon stick.

POPCORN CRUNCH

- 4 qts. popped corn
- 1 1/2 cups pecan halves
- 3/4 cup whole almonds
- 1 1/2 cups sugar
- 1/2 cup light corn syrup
- 1 cup margarine

Mix together popped corn and nuts in a very large container. In a saucepan, combine sugar, corn syrup, and margarine. Bring to a boil, and boil 10 to 15 minutes, stirring constantly. When mixture turns light caramel in color, remove from heat, and stir in popcorn and nuts. Spread out on lightly greased cookie sheet. Break apart when cool.

HOT OLIVE CHEESE BALLS

- 1/2 lb. grated cheddar cheese
- 1/2 cup butter
- 1/2 teaspoon salt
- 1 teaspoon paprika
- 1 cup flour
- Stuffed olives

Make dough from ingredients. Wrap cheese dough around olives. Wrap and freeze. Arrange frozen balls on cookie sheet. Bake at 400 degrees for 10 to 15 minutes or until golden brown. Serve warm.

BREAD PUDDING

- 1 loaf French bread
- 1 qt. milk
- 3 eggs
- 2 cups sugar
- 2 tbs. vanilla
- 3 tbs. oleo
- 1 cup raisins

Soak bread in milk; crush with hands till well mixed. Then add eggs, sugar, vanilla and raisins and stir well. Pour oleo in bottom of thick pan and bake till very firm. Let cool; then cube pudding and put in individual dessert dish; when ready to serve, add sauce and heat under broiler. Serve with Whiskey Sauce.

SAUCE

- 1 stick butter or oleo
- 1 cup sugar
- 1 egg

Cream the sugar and egg until well mixed. Add melted butter and continue to dissolve. Add whiskey to taste which should make sauce cream smooth.

CHOCOLATE COVERED CHERRIES

- 6 tablespoons butter, softened
- 2 1/2 cups sifted powdered sugar
- 1/2 teaspoon milk
- 1/4 teaspoon vanilla extract
- 48 maraschino cherries with stem
- 1 pkg. (12 oz.) semi-sweet chocolate
- 1 tablespoon shortening

Cream butter; gradually add sugar, beating well. Blend in milk and vanilla. Chill mixture for 2 hours or more until firm. Drain cherries; dry on absorbent paper towels. Place bowl of sugar mixture around each cherry. Place on waxed paper-lined cookie sheet. Chill until firm. Melt chocolate and shortening in top of a double boiler. Dip each cherry by the stem into chocolate. Place on a waxed paper-lined cookie sheet. Chill until firm. Store in a cool place. Yields about 4 dozen.

Charm of Country

5546: Home decorating value! Pattern includes instructions for tufted wetted comforter, dust ruffle, pillow sham, 3 pillows, bolster, and tie back curtains.
OFFER GOOD THRU MARCH 31, 1989

**Create

1 OFFER PER FAMILY U.S. RESIDENTS ONLY

State programs offer help with costs and weatherization

Illinois Home Energy Assistance Program

A State-administered program may help you with heating costs this winter. The Illinois Home Energy Assistance Program (IHEAP) provides assistance to help pay heating costs and energy service reconnection fees for income-eligible senior citizens, people with disabilities, those whose household energy source has been disconnected, or other income-eligible families.

"The Illinois Home Energy Assistance Program provides a safety net to protect our state's needy citizens from the cold," said Governor James R. Thompson. "Although IHEAP cannot help everyone, it does provide assistance to thousands of people each year—people who, without this help, might be forced to choose among heat and food, medicine or other necessities."

IHEAP helps reduce energy costs for those eligible by providing either a one-time grant to the household or by making payments directly to the utility company on behalf of the clients. Program funding is provided through the U.S. Department of Health and Human Services and is distributed by the Illinois Department of Commerce and Community Affairs (DCCA) to local ad-

ministrating agencies across the state.

Income-eligible homeowners and renters may qualify for assistance through IHEAP. Eligibility is based on the number of family members and their combined income. For example, the 30-day combined income for a family of four must be \$1,214 or less to qualify for assistance. Income for a single individual for the same period may not exceed \$601.

Last year, more than 312,590 households received heating assistance through IHEAP. In addition, more than 18,423 households were reconnected to their energy source after receiving emergency assistance.

Jay R. Hedges, DCCA director, said applicants may expedite the application process by bringing along a copy of their heating and electric bills and income information to the local administering agency when they apply for IHEAP funds.

Those who want to determine if they qualify for the IHEAP program should contact the agency serving their county. A list of those agencies, by county, is on page 17. You may also call toll free (800) 252-8643 for information.

Illinois Home Weatherization Assistance Program

In addition to the help provided by the Illinois Home Energy Assistance Program (IHEAP), the Department of Commerce and Community Affairs (DCCA) administers a weatherization program for eligible households.

Called the Illinois Home Weatherization Assistance Program (IHWAP), it is available to income-eligible households or persons and is free of charge.

The program is designed to help those qualified reduce the loss of heat from or the entry of cold air into homes through cracks, thin walls and ceilings, or broken windows or doors. Through IHWAP, community service agencies will accept applications to assist those eligible to seal cracks, insulate and fix or repair windows or doors. In addition, an experienced heating contractor will examine a home heating system to determine that the unit is safe and in

good working condition.

Eligibility is limited to households that are eligible for IHEAP; or have an occupant receiving Supplemental Security Income (SSI), Aid to Families with Dependent Children (AFDC), or Aid to Aged, Blind and Disabled (AABD), or are at or below the following annual income:

Size of family	Annual income
1	\$ 7,212
2	9,662
3	12,112
4	14,562

(For a household with more than four, add \$2,450 for each additional person.)

Renters may be assisted if they are eligible and the landlord agrees to program terms. Those who have questions may contact the local community services agency listed on page 17 or call toll free (800) 252-8643.

What's Better than the Best Gas Furnace?

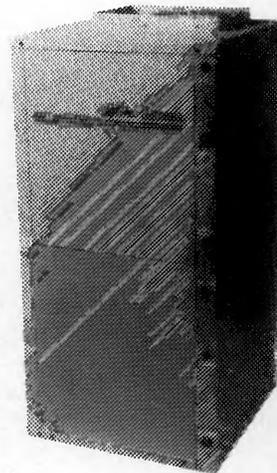

No matter what you've heard about "high efficiency" gas furnaces, there's a heating and cooling system that's up to three times more efficient than the best of them. The WaterFurnace ground source heat pump system.

Not only is a WaterFurnace system more cost efficient, it provides your family with an incredible level of year-round comfort. It keeps you warm in winter. Cool in summer. And consistently comfortable through the seasons in-between. A WaterFurnace system can even provide your home with hot water!

We can show you the details of how a WaterFurnace ground source heating and cooling system can meet your needs for year-round comfort. And give you the kind of true efficiency that you'll never find in a gas furnace.

If you're ready to experience ultimate comfort, efficiency and savings, talk to us about the ultimate heating and cooling system. WaterFurnace.

Because no matter what you've heard about "high efficiency" gas furnaces, nothing beats a WaterFurnace. Find out for yourself!
