

APRIL SHOWERS

The first rumble of thunder and pitter-patter of raindrops signal the beginning of spring. Stronger storms will follow, which can be accompanied by power outages. If high winds cause trees to bring down lines, stay safe by being an indoor spectator. If your co-op hasn't already been in touch with you, contact the office. And be patient. If high winds have hit your area, your lights won't be the only ones out. Trust that we will be there as quickly as we can. No one matters more than you, our member/owner. Brought to you by Southern Illinois Electric Cooperative.
