

Hands down - we make **GEOTHERMAL** affordable

Whether you are in the process of new construction, updating HVAC systems or just looking into geothermal as a heating and cooling alternative, Corn Belt Energy's GeoCents program makes geothermal more affordable.

Corn Belt Energy will pay to have the geothermal loops (the outside loops that go into your yard) installed at your home. In turn, you will pay a monthly fee to utilize the loops.

For more information, please contact Jeremy Myers at jeremy.myers@cornbeltenergy.com or by calling 309-664-9221 or 800-879-0339 x221.
