

ELECTRICITY BRINGS VALUE EVERY DAY

If you're like most people, you don't think much about electricity. You expect the lights to turn on when you flip the switch and the coffeemaker to work each morning.

Because electricity is so abundant, we don't think much about it.

Since many of us have been spending more time at home over the past few months, we likely have been using more energy. And yet, we still expect an endless supply of power with uninterrupted service 24/7.

The only time we really think about electricity is when the power goes out or perhaps when the monthly bill arrives.

Given how electricity powers our modern lifestyle every day, it's a great value, especially when compared to other common services and expenses. For example, think back to the cost of a gallon of gasoline 20 years ago. Consider the cost of groceries or a cup of your favorite specialty coffee from a few years back. In comparison, the cost of electricity has remained largely flat, unlike most other consumer goods.

...the cost of electricity has remained largely flat, unlike most other consumer goods.

Most of us have a cell phone to stay connected and subscribe to cable channels to enjoy more viewing options. We consider these necessities for modern-day life. We can see what we're getting for our money, and we pay the price for those services. In contrast, when we use electricity, we don't necessarily "see" all that we're getting for our money.

But considering what electricity does for us, it's a tremendous value for our quality of life as well as our budgets. For comparison, consider that the average rent increase was nearly 4 percent each year from 2014 – 2019, according to the Bureau of Labor Statistics Consumer Price Index. The cost of medical care had an annual increase of 3% during this time, and education was not too far behind at 2.6%.

So, where did electricity rank? According to the CPI, the increase in electricity costs was less than half a percentage point, 0.4%.

The bottom line: Electricity brings everyday value. Rock Energy provides the reliable service you expect and deserve as valued members of the co-op, and as your trusted energy adviser, we want to help you save energy and money.

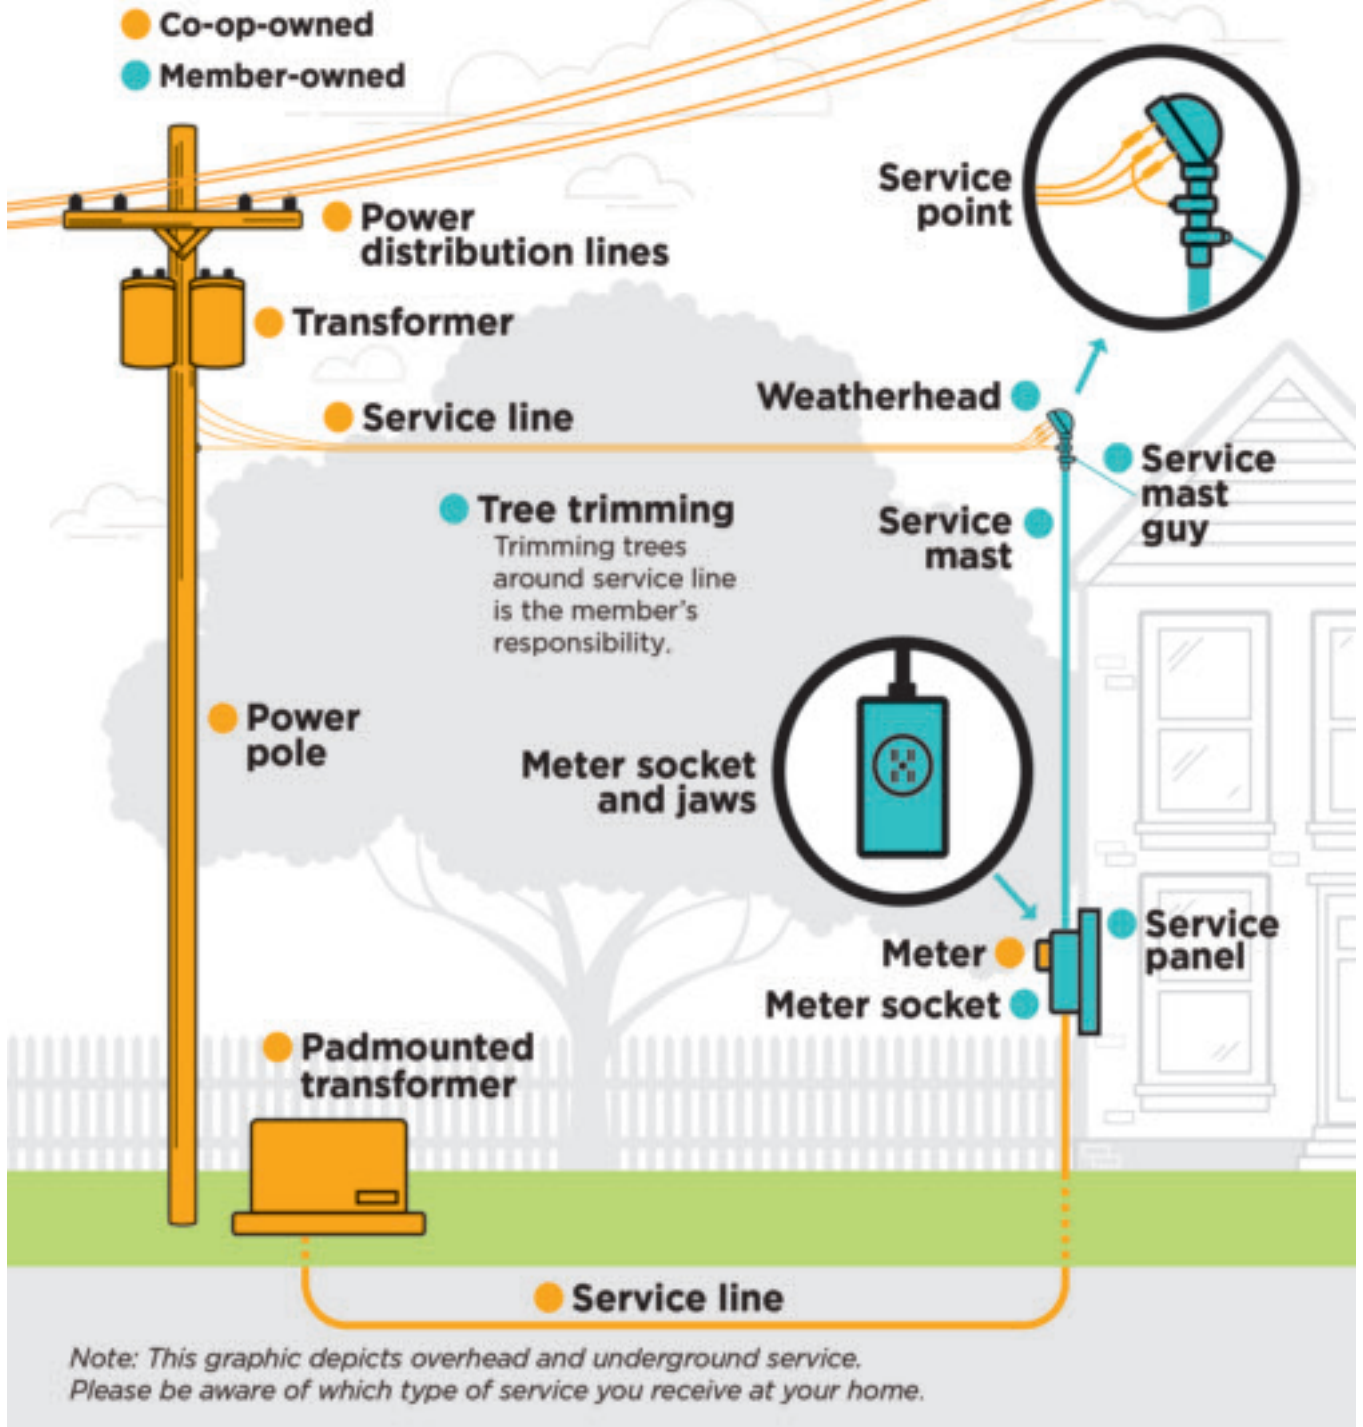

Who Owns What?

Electric Co-op-Owned Equipment vs Member-Owned Equipment

This graphic depicts equipment owned by the co-op (gold) and the member (blue). If a storm damages any equipment owned by the co-op, we are responsible for repairs. If a storm damages any member-owned equipment, the member is responsible for repairs. Members should hire a licensed electrician when making any repairs to member-owned equipment.

VISIT WEBSITE BEFORE INSTALLING SOLAR

If you're thinking about installing a solar generation system on your property, make sure to learn all the facts before signing a contract.

To get started, go to www.rock.coop/solar. There you will find a helpful video that introduces you to solar, Rock Energy's rate information, and a checklist that outlines the steps you need to take from start to finish.

Also included are guidelines for technical requirements and our interconnection policy. This information can be provided to potential vendors so they are aware of the cooperative's requirements.

If you have any questions after reviewing the information, please call us at 866-752-4550 or email DG@rock.coop.

Our video "Solar 101: Learn the Basics" can be found at www.rock.coop/solar.

NEWSLETTER GETS NEW LOOK

Rock Energy News, the newsletter that's delivered each month with your energy statement, will have a new look beginning with the August issue.

You'll still find energy-efficiency advice, safety tips, and lots of co-op news. But the new format will feature an updated design with full-color photos and graphics. Also included will be a "What's Happening" section that lists upcoming co-op events.

Happy Labor day!

Rock Energy Cooperative offices will be closed on Monday, Sept. 7, in observance of Labor Day. Members can make payments in the drop boxes at both offices throughout the holiday weekend and at the payment kiosk outside our South Beloit office, 15229 Willowbrook Road. Even though our offices are closed, standby crews are always available 24 hours a day. If you need to report a power outage, please call 866-752-4550.

Energy Efficiency
Tip of the Month

Installing a smart power strip is a quick and easy way to start saving money while making your home more energy efficient. Smart power strips can actually cut power off to save energy since they are able to detect when a device is in standby mode.—*Source: energy.gov*

a \$25 bill credit!

What's Your Appliance Safety IQ?

Clothes Dryer

Children have been electrocuted when hiding behind dryers; some pets also like to nap there.

Install a childproof lock on the laundry room door, as well as on your washer and dryer—especially front-loading models.

Clean lint screen between loads, and thoroughly clean the vents and duct system at least twice a year.

Make sure hoses, seals, and connections do not leak and are secure.

Refrigerator

Follow the manufacturer's instructions for maintenance.

Clean the coils every 6 months – 1 year.

Keep an eye out for dust or lint under or behind your fridge and remove it to let your refrigerator breathe.

If you have young children in your home, make sure your refrigerator is not a tipping hazard. Consider using an appliance anchor that secures your tall appliance to the wall.

Water Heater

Make sure your water heater is well-maintained.

Make sure it does not have excessive pressure buildup by testing the relief valve (or have it tested) at least once a year.

Ensure vents are connected securely and that the correct parts are used to avoid carbon monoxide production.

Have all components of the appliance inspected regularly (at least once a year) by a technician.
