# THE COOL WAY TO GET HOT WATER

**SAVE BIG MONEY—AND ENERGY—WITH A HEAT PUMP WATER HEATER.**

Water heaters are the second highest source of energy usage in most homes. But an ENERGY STAR® certified heat pump water heater is an energy efficient alternative to typical electric or gas water heaters—and Corn Belt Energy is here to help you save big with rebates on installation costs. You can also save up to \$3,500 over the lifetime of the equipment—we think that's pretty cool.
