

Test drive the co-op's electric SUV

Transportation is evolving and RECC encourages its members to stay informed and prepare for the future. Automakers have been focusing on electric vehicles, resulting in better batteries, longer range, and more charging options. The release of new models qualifying for a \$7,500 tax credit has made pricing competitive and provided the co-op with an opportunity to purchase its own EV.

The Volkswagen ID.4 was selected because it is large enough for most families, travels up to 250 miles without charging, and priced under \$40,000. Members are invited to schedule a test drive by calling our office at 217-438-6197. Our temporary loaner program is also available for qualifying members who want to take it home for the night and share their EV experience with friends and family.
