

Happy Cooperative Month

This month, we celebrate the more than 40,000 cooperatives across the country supporting jobs that provide more than \$25 billion in wages. In addition to electricity, your life likely depends on other products or services from cooperatives. These products can include banking services from credit unions, products from hardware and grocery stores, agricultural products, dairy products, orange juice, meat, sugar, grapes, beets, rice, grain for baked products and cereal, and even pumpkins.

So, celebrate and support your local not-for-profit cooperatives. For more information about them, visit Illinois.coop/about-coops or your local electric cooperative.

Brought to you by Western Illinois Electrical Coop.
