EnerStar searching for former
members 1988 - 1990

As a not-for-profit rural electric cooperative, EnerStar is owned by the members who receive electricity from our cooperative. At the end of the year, after all the revenues have been collected and all the expenses are paid, the remaining margins (profits) are allocated to members who received electric service during the year. These are called capital credits. They represent member equity in our cooperative.

The EnerStar Board of Directors reviews the financial health of the cooperative each year to determine if it is financially feasible to authorize a capital credit retirement. During one such review, the cooperative issued capital

credit checks to current and former members who had electric service for the years 1988 to 1990.

The cooperative is attempting to locate these former members (or possibly their heirs) who received service during that time. The cooperative does not have a valid address on the accounts listed below. If your name or the name of a family member is listed, please contact EnerStar at 1-800-635-4145 during our normal office hours of Monday through Friday 7:30 a.m. to 4:30 p.m. If a member listed is deceased, we would need the estate executor to contact the office for additional instructions on a special estate retirement.

If your name is listed below, or you are an heir of someone listed, please contact EnerStar regarding a capital credit refund.

The EnerStar office will be closed July 4 to celebrate Independence Day.

Potential need for emergency procedures this summer

EnerStar's power supplier is Wabash Valley Power Alliance (WVPA), a generation and transmission cooperative that serves our electric co-op and 22 other distribution co-ops in Indiana, Illinois and Missouri. WVPA is a member of the Mid-Continent Independent System Operator (MISO), the organization responsible for making sure the right amount of electricity is generated and transmitted to all MISO members. EnerStar is responsible for delivering power to its members, like you, via our distribution system.

MISO recently released the results of a Summer Readiness Assessment which outlined their projections for the next few months. The assessment highlighted the potential need for emergency procedures to keep the electric system in balance as well as the need for more resource flexibility to reliably generate and manage

the uncertainty of extreme weather. Coordinated, temporary power outages are an absolute last step emergency measure implemented to protect the electric grid and MISO has never taken this step

in Indiana/Illinois/Missouri. It is anticipated that voluntary curtailments, self-supply options, and non-essential load reductions will have occurred prior to enacting any planned temporary outages.

10 EASY WAYS TO \$AVE

Here are 10 habits you can tweak to save energy:

1. Use cold water to wash your clothes.
2. Unplug battery chargers when not in use.
3. Skip the heat-dry setting on your dishwasher.
4. Unplug appliances and electronics not in use.
5. Run full loads of laundry instead of several smaller ones.
6. When drying clothes, include a dry towel for the first 20 minutes.
7. Keep your refrigerator at 35° to 38°F and your freezer at 0°F.
8. Reduce the setting on your hot water heater.
9. Use smart power strips that shut off power to items not in use.
10. When buying new appliances, consider ENERGY STAR versions.
