

# CHECK THE WEATHER

## BEFORE YOU GO

From 2006 through 2021, 446 people were struck and killed by lightning in the U.S. Nearly two-thirds of the deaths happened while people were enjoying outdoor leisure activities such as fishing, camping and running.

June, July and August are the peak months for lightning across the U.S. More than 72% of lightning deaths occurred in these months, with Fridays, Saturdays and Sundays having slightly more deaths than any other day of the week.

Lightning often strikes away from heavy rain; it can happen up to 10 miles away from rainfall. To prevent lightning-related tragedies, when thunder roars, go indoors.
