

# Changing Saving habits money

Saving money on electricity may seem hard but it really isn't. It's about changing habits... like turning off lights when you leave the room, remembering to unplug appliances when they're not in use and lowering blinds during the day to keep the summer heat out. Your Touchstone Energy® co-op wants to help you save on your electric bill. Visit [www.togetherwesave.com](http://www.togetherwesave.com) and see how the little changes add up.
