

BEHOLD A 40-FOOT STAKE IN THE GROUND.

In 1940, this was more than a pole. It was a symbol of determination. It spurred hope, cooperation and growth. And today, you can keep that spirit alive at Egyptian Electric Cooperative by saving energy. Find out how at TogetherWeSave.com.

Egyptian Electric was organized on August 25, 1938 at Murphysboro. Our first lines were energized on March 30, 1940 to serve 224 members. Today, we have over 2,250 miles of line serving nearly 15, 000 meters.
