

Save Energy and Feed the Hungry

Bring us a commercially canned or packaged non-perishable food item and we'll give you a compact florescent light bulb in exchange. We'll then donate the food to a local food pantry to be given to those in need.

The bulb is a 23 watt CFL which is comparable to a 100 watt incandescent bulb. This offer is for members of Egyptian Electric Cooperative only and is limited to four bulbs per member, while supplies last.

Saving energy while feeding the hungry. Your electric cooperative improving the quality of life for all.
