

Will your furnace last another year?

Now's the time to start thinking about that old furnace in the basement. Will it last another year? And just as important, what will it cost you to operate this year? Now might just be the best time to be proactive about changing it.

As a member of Menard Electric you could qualify for a Home Rebate to replace that inefficient furnace: \$350 if you choose a natural gas "traditional" furnace, \$1,000 for a heat pump, and \$1,500 if you go for geothermal. Menard Electric offers an additional \$600 for geothermal and \$200 for heat pumps. And don't forget, tax credits up to 30 percent or \$1,500 are still available until December 31 (see page 16e for more information).

In addition to the money you save on installing your new system, you'll save money all season long on your energy bills.

Call our office today at 217-632-7746 for more details about qualifying for our rebates. Our Home Program is for a limited time only and will end once all the grant-supplied funds are used.
