

These members are paying their electric bill ...

because they use RECC's Auto Pay.

By using one of our automatic bill payment plans, you can save time each month and be assured that your electric bill is paid before the due date. Automatic payments can be set up on a MasterCard or VISA credit/debit card, or through bank draft from your savings or checking account.

How it works:

The Automatic Payment Plan is dependable, flexible, convenient and easy. You authorize your electric billing payments to be made from your credit/debit card, checking or savings account. Then, just sit back and relax. Your payments will be made automatically by the Due Date each month, and your payment amount will appear on your next statement. The authority you give us to charge your account will remain in effect until you notify us to terminate the authorization.

You can also check your account information on-line through our web site at www.recc.coop. In addition to the kilowatt hours used, charges and payments, you can see your past usage and payment history with useful graphs of your energy consumption. You can even choose to receive your billing statement on-line, with an e-mail notice to let you know when your new statement is available!

Sign up now!

You can sign up for automatic payment by calling the RECC office at (800) 245-7322, and requesting an authorization form for automatic bank withdrawal or credit card payments. Or, download the form at our web site, www.recc.coop!
