

THE BEST

Available in 50 and 85 gallon models.

BEST CONSTRUCTION

No Rust, No Corrosion—EVER! Unique 2-ply PermaGuard design: A seamless, blow-molded polybutene inner tank wrapped in filament-wound fiberglass. Great for 'brutal well water' conditions.

BEST DURABILITY

Toughest and strongest tank in the residential water heater industry. No one comes close. Marathon tanks are regularly tested to withstand 100,000 cycles from zero-to-150 psi. Even 'high-end' steel water heaters struggle to make it 1/4 the way through this punishment.

BEST FUNCTIONALITY

Beauty more than skin deep. No anode rod means no rotten-egg smell from sulfates found in many water systems. Easy-on/easy-off water connections. Self-cleaning action of bowl shaped tank bottom, coupled with a brass drain valve at the very bottom of the tank provides for more complete draining.

HIGH EFFICIENCY

Save on your energy bill. 2.5 inches of Envirofoam® insulation minimizes stand-by heat loss. No 'heat-trap' fittings that can clog or chatter.

BEST VALUE

Marathon's renowned durability eliminates the cost of buying and the cost of re-installing a new water heater every 10-years (national average). This coupled with energy savings makes the total cost of ownership lower than typical water heaters.

BEST WARRANTY

Lifetime tank warranty*—The last water heater you will need to buy for your home. If tank fails you get a new Marathon with no 'pro-rating' deductions. Selling your home, making a warranty claim, use in multi-family, commercial/industrial/agricultural or high-temperature applications does not void warranty (*contact us for more details.).

"GREEN POWER" READY

Ready to use for 'thermal storage' with geo-thermal heat pumps, solar and 'Green/Renewable Energy.' Conduit between control boxes facilitates wiring for 'Off-Peak' and special controls.
