

We're Looking Out for You

There are many costs we can't control. Fuel costs, the weather and environmental mandates can't be predicted, but all of them impact rates. We're working hard every day to control what we can - to provide you with the most reliable power at the lowest price with the best service possible. We're looking out for you every day. That's our promise as your Touchstone Energy cooperative. Visit www.togetherwesave.com for energy saving tips, instructional videos and interactive tools.
