

Rock Energy Upgrading Natural Gas System in Rockton

In our continuous effort to supply members with safe and reliable natural gas service, Rock Energy Cooperative is working on a project to upgrade our natural gas system in Rockton.

This project involves replacing some older natural gas mains, as well as some services pipes to members' homes. Rock Energy will contact you if a service line replacement is necessary.

Construction started in late March and will continue through the summer. If you have any questions regarding the project, please contact Jason Mayer at 866-752-4550.

Rock Energy Cooperative natural gas crews—Gas Technician James Gander in the excavator and Apprentice Gas Technician Dan Alseth on the ground—are working in Rockton to replace old gas mains. The project will continue throughout the summer.

and the projected timeline.
