Your Touchstone Energy® Partner 😥

Look Up and Live

Remember to allow needed clearances between grain bins and electric lines.

X Tith the increased grain production in the United States in recent years, more and more grain bins are being constructed due to storage and drying needs. Grain bin construction has seen an increase in southern Illinois as well.

Something that often gets overlooked when planning for new grain bin sites is the location of overhead power lines. In recent years, dozens of deaths and serious injuries have occurred on farms when grain augers or dump trucks have come into contact with overhead energized electric lines. Look up and observe the areas around your grain bins or new grain bin site. What do you see? Are there electric lines nearby? What are your future plans 5, 10, or 20 years in the future?

Accidents, however, can be prevented. If you are planning the construction of any new grain bins, be sure to take the placement of existing power lines into account and contact Southern Illinois Electric Cooperative (SIEC) before your plans are finalized. The National Electrical Safety Code

(NESC) contains regulations concerning electric lines near grain bins. There can even be financial consequences for violating NESC codes if electric lines have to be relocated or buried.

If you or a contractor construct a grain bin too close to electric lines, SIEC will have to redesign the nearby electrical system to make sure all NESC codes are followed. This can result in unwanted costs that could have been avoided. SIEC cannot provide electric service to any grain bin built near an existing line that does not meet the clearance requirements. If you have any questions, call SIEC at (800) 762-1400. We will be more than happy to help you with your Kichard Gaddis. supper

It is important that you understand the proper clearances for electric lines around your grain bins. The NESC

specifies distances that electric lines must be from the loading and non-loading sides of your bins. The diagram shows recommended distances to place new grain bins from any overhead electric lines. Contact SIEC so that exact clearances can be determined from the NESC for your specific situation. young Axo

Also, consider the route of trucks and your equipment around your grain bins. What is highest implement or dump truck situation that will happen around those bins and electric lines? Is everything out of harm's way, both currently and in the future?

Share these safety items about grain bins with any friends, family members, and farm workers involved in moving grain. You might just save their life.

2016 Annual Meeting

> Ronald E. Osman (Attorney) General Manager Chris L. Bennett Bree D. Hileman (Editor)

For Outages Call: 800-762-1400 * 618-827-3555

You can help us locate these former SIEC members.

n October 2015, SIEC mailed Capital Credit checks to the last known address of former members who received electric service for 1986 Kimberly Prater . 1011d pur

Following is a partial list of former members who have not cashed their checks or their check was returned because of an invalid address. We will publish the remaining names on our list over the next several months. We ask that if your name is on the list, you have knowledge of a current address, or know someone who may have this information to please call the Cooperative office at 800 762-1400 or 618 827-3555 and ask for Lana.

Thank you for assisting us in locating these former Cooperative members.
