

THE BEST

Made in USA.

Available in 50 and 85 gallon models.

BEST CONSTRUCTION

No Rust, No Corrosion—EVER!
Unique 2-ply PermaGuard design:
A seamless, blow-molded
polybutene inner tank wrapped in
filament-wound fiberglass. Great for
'brutal well water' conditions.

BEST DURABILITY

Toughest and strongest tank in the
residential water heater industry. No
one comes close. Marathon tanks
are regularly tested to withstand
100,000 cycles from zero-to-150
psi. Even 'high-end' steel water
heaters struggle to make it 1/4 the
way through this punishment.

BEST FUNCTIONALITY

Beauty more than skin deep. No
anode rod means no rotten-egg
smell from sulfates found in many
water systems. Easy-on/easy-off
water connections. Self-cleaning
action of bowl shaped tank bottom,
coupled with a brass drain valve at
the very bottom of the tank provides
for more complete draining.

HIGH EFFICIENCY

Save on your
energy bill. 2.5
inches of
Envirofoam®
insulation minimizes stand-by
heat loss. No 'heat-trap' fittings
that can clog or chatter.

BEST VALUE

Marathon's renowned durability
eliminates the cost of buying and
the cost of re-installing a new water
heater every 10-years (national
average). This coupled with energy
savings makes the total cost of owner-
ship lower than typical water heaters.

BEST WARRANTY

Lifetime tank warranty*—
The last water heater
you will need to buy for your home.
If tank fails you get a new Marathon
with no 'pro-rating' deductions.
Selling your home, making a
warranty claim, use in multi-family,
commercial/industrial/agricultural
or high-temperature applications
does not void warranty (*contact us
for more details.).

"GREEN POWER" READY

Ready to use for 'thermal storage'
with geo-thermal heat pumps, solar
and 'Green/Renewable Energy'
Conduit between control boxes
facilitates wiring for 'Off-Peak' and
special controls.
