## ARE ENERGY COSTS DEVOURING YOUR HOUSEHOLD BUDGET?

Turn things off when not in use. It's the simplest and most effective way to reduce energy waste.

**Run full loads** in your dishwasher and washing machine, and wash clothes in cold water.

**Unplug unused electronics.** Many devices still use standby power when not in use.

Adjust the thermostat at night and when you're not at home to give the HVAC system a break.

**Take shorter showers** and turn off the tap while shaving or brushing your teeth.
