

OCTOBER IS NATIONAL CO-OP MONTH

This month, cooperative employees across the U.S. are celebrating the honorable tradition and members we serve. Your electric cooperative was built by people who came together to bring electricity to our community, and it exists to this day to provide safe, reliable and affordable energy to you, our members. Just as important is our commitment to enrich the lives of those we serve.

We are more than your energy provider. We support this community and work to power economic development and prosperity for our friends and neighbors.

Your electric co-op was built by the community, for the community.
