Your Touchstone Energy® Cooperative 

Alan W. Wattles

Across The President's Desk

Lineworkers are wired for service

In the quiet hours before dawn breaks, while many of us are still nestled in our beds, lineworkers begin their day, often clad in flame-resistant clothing, safety goggles, rubber gloves and thick, heavy boots.

They are the individuals who epitomize dedication to service in its purest form. As we celebrate Lineworker Appreciation Day on April 14, this is an important moment to reflect on the essential role they play in our daily lives.

Amid towering utility poles and power lines, lineworkers exhibit a strength that goes far beyond the physical. Whether battling inclement weather, troubleshooting technical problems or navigating treacherous heights, lineworkers demonstrate resilience and a quiet determination to keep our lights on, our homes comfortable, and our communities connected.

MCEC crews travel across our three-county service territory, building, maintaining and repairing parts of

our local system. Their extraordinary skills ensure our homes remain connected to the grid, businesses stay operational, and emergency services remain accessible — a lifeline that connects us all.

In moments of crisis, when the lights go out and we find ourselves in the dark, lineworkers emerge as beacons of hope. Their swift response restores normalcy, offering reassurance in times of uncertainty. Whether repairing storm-ravaged power lines or ensuring continuity during emergencies, their unwavering commitment illuminates life when we need it most.

MCEC lineworkers also answer the call beyond the boundaries of home. Our crews travel to fellow co-ops, near or far, when widespread outages occur, and additional support is needed. Cooperation among cooperatives is one of our seven guiding principles, and no one embodies this core commitment better than lineworkers.

This month, as we celebrate the remarkable men and women who ensure reliable power, let's recognize their unwavering dedication to the local communities they serve.

The next time you flip a switch, please take a moment to remember those who make it possible — lineworkers, who are wired for service and dedicated to illuminating life.

ELECTRIC CO-OP SERVICE DENSITY compared to OTHER ELECTRIC UTILITIES

Electric cooperatives maintain more power lines per consumer than other types of electric utilities.

Even though we serve fewer consumers per mile of line, we will always go the extra mile for our members.

MCEC line outages February 2025

Date	Duration	# Out	Map Location	Cause Desc	Substation
02/08/25	0:50	29	Powell Rd	Other, Deterioration	Poe

Monroe County Electric Cooperative recognized for outstanding workplace practices

Safety is paramount in the electric industry. To advance safety education and practices, lineworkers, supervisors and warehouse personnel from electric cooperatives across Illinois gathered in Springfield for the annual Safety and Energy Conference held Jan. 29-30. The event was hosted by the Association of Illinois Electric Cooperatives (AIEC).

The conference emphasized the importance of safety and leadership in the energy industry, providing participants with training and resources to ensure their well-being on the job. Sessions included discussions on active leadership, staying focused and safe practices in the workplace.

During the conference, safety awards were presented to honor both individual and cooperative-wide commitments to fostering a safe work environment. Monroe County Electric Cooperative was recognized for its outstanding safety performance over the past year, receiving 2024 awards for Best Loss Time Rate and Best Incident Rate. These awards underscore a cooperative's dedication to maintaining a safe working environment, exceeding industry safety expectations, and cultivating a proactive safety culture.

The Best Loss Time Rate Award is given to the cooperatives with the lowest number of lost work time due to workplace injuries, relative to the number of hours worked. It reflects a cooperative's effectiveness in preventing serious incidents that could keep employees off the job.

The Best Incident Rate Award recognizes the cooperatives with the lowest overall number of recordable workplace incidents, including minor injuries. It highlights a

commitment to maintaining a consistently safe work environment for all employees.

As the electric industry continues to evolve, safety remains a top priority. It ensures that the workforce can continue to serve communities efficiently and without harm. The AIEC celebrates the electric cooperatives and individuals that prioritize safety, consistently demonstrate leadership in safe practices, and foster a strong safety culture.

ENERGY EFFICIENCY TIP OF THE MONTH

Turn your suds into savings. Lower your energy use in the laundry room by washing clothes with cold water whenever possible, as heating water accounts for most of the energy used in a laundry cycle. Wash full loads to make the most of energy savings, and use high-efficiency detergent designed for cold washes. For drying cycles, clean the lint filter before each load to improve airflow and use dryer balls to reduce drying time.

Capital credit checks returned and/or uncashed

Issued May 2024 for a partial distribution of 1996 and a partial distribution of 2023 coop capital credits.
