MCEC members can earn bill credits with new Peak Power Rewards Program

PEAK POWER REWARDS

With hot summer days just around the corner, Monroe County Electric Cooperative is rolling out a new opportunity for members to save money. Nearly 7,000 members can now enroll in Peak Power Rewards (PPR) — a voluntary program that offers bill credits in exchange for reducing electricity use during periods of high demand.

Developed and launched in partnership with MCEC's wholesale power provider, Southern Illinois Power Cooperative (SIPC), Peak Power Rewards is designed to make conservation simple. By shifting or reducing energy use for just a few hours at a time, members can help lighten the load on the grid while earning credits on their monthly bill.

How the Peak Power Rewards program works

- **Notification of events:** When SIPC predicts high electricity demand, they'll call a "Peak Power Rewards event." Each event will last between two and four hours. Members enrolled in the PPR program will typically receive 24 hours' notice via email or text so

they can plan to reduce energy usage.

- **You choose how to participate:** During an event, members decide if and how they want to reduce their energy use. Participation is voluntary, and there are no penalties for not participating.
- **Earn bill credits:** Members who reduce energy use below their personalized baseline during an event can earn \$1 for each kilowatt-hour (kWh) saved. Each participant's baseline is calculated using their recent energy usage. Pilot participants averaged about \$5 in bill credits per event.

The Peak Power Rewards program will typically operate during seasons of extreme temperatures, such as winter (December-February) and summer (June-August). However, events may occur at other times of the year if demand spikes, pricing surges, or grid emergencies arise.

Simple ways to save during a PPR event

Members can take part through small, temporary adjustments such as:

- Adjusting the thermostat a few degrees lower in winter or higher in summer.
- Turning off unnecessary lights and electronics.
- Avoiding use of major appliances like ovens, dryers or pool pumps during the event.

Even modest changes can make a meaningful difference — not just for individual members, but for our entire cooperative.

Ready to enroll?

Peak Power Rewards is open now, just in time for the summer season. To learn more or sign up, members can visit scan the QR code to enroll or visit mcec.org.

When the lights go out, lineworkers are ready to answer the call, day or night, to safely restore power and keep our communities moving forward. They take pride in powering the places we call home. Today and every day, we thank lineworkers for their service and commitment.

Lineworker Appreciation Day
April 13, 2026

Ready When it Matters Most

MCEC

02/14/26	1:14	14	Ames Rd	Contamination	Poe
02/25/26	0:27	3	Gilmore Lake Rd	Small Animals Or Birds	Millstadt

ENERGY EFFICIENCY
TIP OF THE MONTH

As we prepare for the seasonal shift, remember to set your ceiling fan rotation accordingly. In winter months (or whenever your home heating system is running), fan blades should rotate clockwise, which produces an updraft that pushes warm air down. In summer months (or whenever your home cooling system is running), blades should rotate counterclockwise, which produces a downdraft or windchill effect that makes you feel cooler. When used correctly, ceiling fans can boost comfort and allow you to adjust the thermostat a few degrees for energy savings.

You can't AVOID what you CAN'T SEE

Starting a job — big or small — without first getting utilities marked could result in serious injury, service disruptions for you and your neighbors, and a hefty fine.

Call 8-1-1 before you dig.
