

Happy Halloween

from Southern Illinois
Electric Cooperative

Spooky Safety Tips

-  **Watch for ghosts and goblins:** Drivers should stay alert for little trick-or-treaters crossing dark streets.
-  **Light the way:** Carry flashlights or glow sticks so kids stay visible in the dark.
-  **Clear the walkways:** Keep cords, light strands, and decorations away from paths to prevent trips and electrical hazards.
-  **Stay clear of equipment:** Remind children to never touch or play near transformers, green padmount boxes, and power poles.
-  **Inspect outdoor lights:** Check that all lights and cords are rated for outdoor use and free of frayed wires.

Stay safe, save energy, and have a wonderfully electrifying night!
